

applied towards the unrevealed wagers, and the wager pool to the patron's account balance. Then, the patron may use this updated account balance to, for example, play traditional games. Alternatively, the patron may go to service client terminal 104 and request that the patron's unrevealed wagers be erased and request a refund of the money that was applied towards the unrevealed wagers, wager pool, and or any of his account balance. In the latter two embodiments, when erasing the unrevealed wagers, the server 108 may record the results of these unrevealed wagers in the patron account file and apply these results to wagers that the patron purchases in the future. Other such methods will be apparent to those skilled in the art from the foregoing and following description and thus, are within the scope of the present invention. For example, the patron may not choose to reveal results and may return to the facility and request a refund. Alternatively, the patron could come back to the facility and may want to use the money applied towards the unrevealed wagers to play traditional games.

IN THE CLAIMS:

/ Please amend claims 1, 6, 8, 10, 17, 22, 23, 26-31 and 33-34 as follows:

Sub. B'1. (Amended) A gaming method, comprising:
 receiving, from a first client terminal, a purchase request for at least one wager;
 determining the results of the at least one wager; and
 storing the results of the at least one wager in a database;
 receiving, from a second client terminal during game play, a request to reveal the
 results of the at least one wager; and
 sending the results of the at least one wager to the second client terminal.

Sub. C2 > 6.

(Amended) The method of claim 1, wherein receiving, from a second client terminal during game play, a request to reveal the results of the at least one wager includes receiving, from a second client terminal during game play, a request to reveal the results of the at least one wager via an online network.

Sub. C3 > 8.

(Amended) A gaming method, comprising:
receiving, from a client terminal, a purchase request for a plurality of wagers;
determining the results of each of the plurality of wagers; and
storing each of the results of the plurality of wagers in a database without sending the results of the wagers to a client terminal until game play.

Sub. B3 > 10.

(Amended) A gaming method, comprising:
receiving, from a first client terminal, a patron identifier identifying a patron;
receiving, from the first client terminal, a purchase request for at least one wager;
debiting the account balance of a patron account corresponding to the received patron identifier based on the received purchase request;
determining the result of the at least one wager;
storing the result of the at least one wager in a database;
receiving, from a second client terminal during game play, the patron identifier identifying the patron and a request for the result of the at least one wager; and
sending, to the second client terminal, the result of the at least one wager.
